Bugzilla-Id:	4501			

Description

I have no idea how wide in scope this is. Without knowing something about the incoming data, it's impossible to start programming. This is very vauge. I think time would be better spent getting standard formats like VEGX working. We could also add TurboVeg or other specific formats, but other undefined formats can use VegBranch

Source is section 2.6.2 number 10 of requirements document, page 64
