Kepler - Bug #4517

Verify that the search capabilities work

10/29/2009 12:18 PM - Chad Berkley

Status:	Resolved		**Start date:**	10/29/2009
Priority:	Immediate		**Due date:**	
Assignee:	Jing Tao		**% Done:**	0%
Category:	core		**Estimated time:**	0.00 hour
Target version:	2.0.0		**Spent time:**	0.00 hour
Bugzilla-Id:	4517			

Description

As per the roadmap, search capability requirements include:

- local search of direstories
- remote search of repositories
- search results that contain both actors and workflows
- ability to open a workflow from the library

To close this bug, verify that the preceding functionality is operable.

History

#1 - 02/24/2010 10:08 AM - Jing Tao

Except bug 4462 and 4799, the others function seems working

#2 - 02/24/2010 10:10 AM - Chad Berkley

To close this bug, close bug 4462 and bug 4799

#3 - 03/10/2010 02:24 PM - Jing Tao

Need to look at the print out on the console when we search and download data on ecogrid.

#4 - 03/15/2010 04:28 PM - Jing Tao

The debug message has gone when I tried to reproduced the issue on comment 3. I tried both kepler 2.0 and trunk. Ben verified this on kepler 2.0. So someone either turned the logging level down or changed something.

#5 - 03/19/2010 11:25 AM - Jing Tao

I saved a workflow into local repository as a kar file. The search it on the components panel. The result shows:

Workflows
- eml-simple-plot,kar
- eml-simple-plot

I tried to drag the eml-simple-plot,kar into the canvas. But I couldn't. I only can drag the second eml-simple-plot (a composite actor) to the canvas.

#6 - 03/19/2010 11:26 AM - Chad Berkley

I don't think you're supposed to be able to drag the kar to the canvas. It's just a container.

#7 - 03/19/2010 11:37 AM - Jing Tao

Chad:

What can we do to the kar search result? How can we open it?

Thanks,

Jing

#8 - 03/19/2010 11:53 AM - Chad Berkley

You should be able to drag the contents of the kar file. If the kar file doesn't have anything in it, then there is nothing to drag.

#9 - 03/19/2010 12:21 PM - Jing Tao

In this case, the kar file only has a composite actor at the result panel. Actually, I saved a workflow to the kar file. And after dragging the composite actor to the canvas, I couldn't run it.

You may reproduce the issue by saving eml-simple-plot.xml as a kar file locally. Then search it.

#10 - 03/19/2010 01:19 PM - Sean Riddle

It's probably Kepler keeping you from running a workflow without a top-level directory. Put a PN or SDF directory in the top level along with the no-port composite and try it.

#11 - 03/19/2010 03:05 PM - Jing Tao

Aaron clarify the issue:

on the search result panel, right clicking the kar entry will bring a menu. One menu item is "Open". Use this menu item, user can open the workflow.

#12 - 04/26/2010 01:46 PM - Jing Tao

close the bug.
