

## Kepler - Bug #4518

### Workflow Run Manager - no imported run tags

10/30/2009 04:25 PM - Derik Barseghian

<b>Status:</b>	Resolved	<b>Start date:</b>	10/30/2009
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Target version:</b>	2.0.0	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	4518		
<b>Description</b>			
If you export a run that has tags into a kar, then delete that run from the WRM, then open that kar, the imported run displays no tags. This is because no tags are inserted into provenance on import. To be able to do this insertion, I will first have to add code to serialize the tag info (type, urn, ontology_uri,) into the WorkflowRun moml.			

### History

#### #1 - 11/06/2009 01:33 PM - Derik Barseghian

Tags are now serialized into WorkflowRun moml. Run tags are at the top level, workflow tags are in a workflowTags section. The tags are imported and display when you open the kar. The way in which tags are created from those found in kar needs testing and may need some work.
