Kepler - Bug #4533

printing from the report viewer prints the workflow editor content

11/05/2009 10:16 AM - Oliver Soong

Description

I didn't entirely expect this to work, but File->Print from the report viewer prints the workflow content, not the report. It would be nice to either make it work (!) or to disable the entry from the menu while in the report designer and viewer modes.

Do we have a solution (even an idea) about how to change the Menu bar based on the current view? I'm thinking that we don't...

#2 - 05/11/2010 10:50 AM - debi staggs

retargeting to post-2/wrp
This would be part of an entire Kepler UI redesign.
save for later as open...
