Description

If in WRP I open and run a workflow, quit and restart Kepler, and then right click on the run and select Export Archive, I get the following error. I think this or similar has occurred and been fixed in the past(?). It seems to happen regardless of if I've designed a report for the workflow before running it. Debi or Ben, if it doesn't look familiar, I can look into it.

```
ERROR (org.kepler.kar.handlers.ReportLayoutKAREntryHandler.saveReportLayout:286) Could not set LSID for ReportLayout: null
