Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	4550		
Description			
We installed lauch4j in lib dir. However, it is the version which only works for linux. In mac and windows it will fail. So we should do either install mac and windows version or ask user to install themselves.

We removed launch4j lib from morpho. User should specify the launch4j location by himself.
