Description

r21538, now setting KARFile members _lsidNames and _lsidTypes, introduced a bug: Export Run from WRM gives an error from CacheSearch.add(). I commented out the adding of export runs to the library in r21539 for the time being until I can look into this.

History

#1 - 11/16/2009 03:13 PM - Derik Barseghian

fixed in r21544 -- just returning false when trying to add a object to cache that has no CacheObjectInterface. reenabled the adding of wrm-kars to library during export, but now only if kar in local repo.
