

Kepler - Bug #4568

must have some way to view full path to port in report

11/20/2009 04:44 PM - Oliver Soong

Status:	Resolved	Start date:	11/20/2009

Bugzilla-Id:	4568		
Description Bug 4471 got rid of the report TOC. Somewhere along the line, tooltips for the report items disappeared. I now have no way of distinguishing Composite.RExpression.graphicsFileName from Composite2.RExpression.graphicsFileName. This is actually a pretty big problem for me.			

History
