

Kepler - Bug #4570

dangling file handle for KARs

11/20/2009 05:23 PM - Oliver Soong

| Description I'm not a 100% certain this is the cause, but on Windows, if I open a KAR file then close it, Kepler doesn't seem to release the file handle, which prevents me from deleting the KAR. I seem to recall having problems overwriting KAR files in the past, so this is somewhat problematic. Obviously, closing Kepler releases the file handle. | | | |

History

#1 - 01/12/2010 05:04 PM - Oliver Soong

Ben said to do this.

#2 - 01/25/2010 04:45 PM - Aaron Aaron

Fixed now, just needed to call the close() method on the KARFile after opening it.
