Morpho - Bug #458

Need to configure Morpho to accept stream-based result sets

04/05/2002 09:07 PM - Dan Higgins

Description

For performance purposes, Metacat needs to send results in a stream created as results are generated (rather than getting all the results and then sending them). [The other option being considered is to send the response in 'chunks' of a set size.]

Morpho needs to be able ot handle both stream and chunk based responses. It should create the ResultSet table and add result rows as they arrive from the server (rather than getting the entire result set and then displaying the whole table.)

History

#1 - 04/22/2004 11:01 AM - Dan Higgins

JIng has added code to implement this and it is in Morpho 1.5.0. May need some further refinements
