Target version:	2.0.0		**Spent time:**	0.00 hour
Bugzilla-Id:	4582			

Description

I am not sure what the function of this file is. However, I noticed that it references specific modules. Here is the text of the file:

depend0=common
depend1=ptolemy
depend2=core
depend3=util
depend4=reporting

How will this take into account different module versions?

History

#1 - 12/02/2009 10:51 AM - ben leinfelder

I think this is here from waaay back when we did the 'ant make-module' target. I don't know why it is here, either.
Can we delete it? Other modules don't seem to have this file.

#2 - 12/03/2009 10:38 AM - debi staggs

This was just an old file, that had no current use as far as we can tell. It has now been deleted.
