Description

When attempting to add a replication record via the gui at

```
&lt;metacat_context_url&gt;/style/skins/dev/replControl.html
```

metacat throws an error:

```
duplicate key value violates unique constraint "xml_replication_pk"
```

History

#1 - 12/02/2009 03:58 PM - Michael Daigle

Change the sql to use a prepared statement, which works.

Only attempt to download cert if a url was provided.
