

Kepler - Bug #4596

selecting text entry box of report item moves activation highlight but does not update properties window

12/03/2009 03:24 PM - Oliver Soong

Status:	Resolved	Start date:	12/03/2009

Bugzilla-Id:	4596		
Description			
Create 2 text items with different attributes. Click in the text entry area of the non-highlighted one. It will now gain the highlight and the cursor will jump as expected, but the properties window is not updated.

This is now fixed. Clicking in the text entry area updates the properties window.

#2 - 12/03/2009 05:34 PM - Oliver Soong

I should point out this also affects section headers and dynamic report items. Basically, it's anything with a text box on it.

#3 - 12/14/2009 07:29 PM - Oliver Soong

I think this got fixed, but never re-closed.
