

Kepler - Bug #4613

EML 2 Dataset automatically updating to latest package doesn't trigger "workflow change"

12/08/2009 05:43 PM - Oliver Soong

Target version:	2.X.Y	Spent time:	0.00 hour
Bugzilla-Id:	4613		
Description			
<p>I have a saved workflow that uses judithk.40.47 in an EML 2 Dataset actor. It also has "Check for latest version" checked. The LSID is urn:lsid:gamma.msi.ucsb.edu/OpenAuth/:965:34:50. judithk.40 is currently at judithk.40.48. When I open Kepler, it prompts to update the actor to use the latest version. When closing Kepler, it doesn't prompt to save changes. If I let Kepler update the workflow to use judithk.40.48 and save, the LSID is not updated.</p>

It's odd that it does work for, say, the RExpression actor and the "Automatically display graphics" checkbox. I'm not sure why that changeRequest isn't bumping the LSID rev

#2 - 11/10/2011 07:54 PM - Derik Barseghian

I'm guessing this is fixed by the fix for bug#5504, but needs testing.
