

Kepler - Bug #4613

EML 2 Dataset automatically updating to latest package doesn't trigger "workflow change"

Description

I have a saved workflow that uses judithk.40.47 in an EML 2 Dataset actor. It also has "Check for latest version" checked. The LSID is urn:lsid:gamma.msi.ucsb.edu/OpenAuth/:965:34:50. judithk.40 is currently at judithk.40.48. When I open Kepler, it prompts to update the actor to use the latest version. When closing Kepler, it doesn't prompt to save changes. If I let Kepler update the workflow to use judithk.40.48 and save, the LSID is not updated.

It's odd that it does work for, say, the RExpression actor and the "Automatically display graphics" checkbox. I'm not sure why that changeRequest isn't bumping the LSID rev

#2 - 11/10/2011 07:54 PM - Derik Barseghian

I'm guessing this is fixed by the fix for bug#5504, but needs testing.
