#### Description

handleGetRevisionAndDocTypeAction API will return both revision and doctype for a given docid. Currently, it only searches the xml\_documents. It may gives clients a wrong message in this case:

There is no record in xml\_documents, but it did have records in xml\_revision table.

Here is the solution:

1. Search xml\_documents table first. If metacat finds a result, returns it back to client.
2. If couldn't find result in xml\_documents, then search xml\_revisions table.

#### History

##### #1 - 01/13/2010 09:26 AM - Jing Tao

now, it can search both xml\_documents and xml\_revisions.

##### #2 - 03/27/2013 02:27 PM - Redmine Admin
