<b>Description</b>			
<p>I was demonstrating the knb dataset registry, and put in a test dataset (knb.230). We logged in (as uid=mobrien,o=LTER...) While viewing the dataset, we clicked on the "View data table" link, and got the "public is not allowed to view this data table". I was still logged in, and the metadata for the data entity displayed an "authentication" value.</p>
