

Kepler - Bug #4681

Check all file properties before release

01/20/2010 04:45 PM - Derik Barseghian

Status:	Resolved	Start date:	01/20/2010
Priority:	Normal	Due date:	
Assignee:	Chad Berkley	% Done:	0%
Category:	general	Estimated time:	0.00 hour
Target version:	2.0.0	Spent time:	0.00 hour
Bugzilla-Id:	4681		
Description			
See bug#4056 for background.			
I think we need to go through all our files before release to make sure the appropriate properties are set, e.g. svn:keywords (do we want to agree to a standard set?) and svn:eol-style.

Which properties should we set? I propose keywords and eol-style as Derik said. Are there any others? I can write a build task to do this.

#2 - 03/09/2010 04:26 PM - Christopher Brooks

Yep, svn:keywords and svn:style for all files:

```
bash-3.2$ svn proplist README.txt
```

Properties on 'README.txt':

svn:keywords

svn:eol-style

```
bash-3.2$ svn propget svn:keywords README.txt
```

Author Date Id Revision

```
bash-3.2$ svn propget svn:eol-style README.txt
```

native

Executables should probably have svn:executable set

ptll/adm/bin/svnpropcheck might help.

#3 - 04/28/2010 01:25 PM - Chad Berkley

updated file props for trunk and 2.0. if this is done in the future, do not update keywords for any jar files. this breaks some of them.
