<b>Description</b>			
Eric requests the ability to easily save just the report instance. This should probably be a 1 step process when you're looking at the Report Viewer. I think the best solution would probably be to change the File => Save option to do this when on the Report Viewer. If this is too hard, just adding a File => Save Report menu option seems good for the interim.

#### #1 - 01/03/2011 12:23 PM - Derik Barseghian

Trunk now has a working Save pdf button on the report viewer tab, but leaving this open for feedback -- should this button be removed and this made a File menu option instead?

Sure it would be nice to have the File->Export PDF... option, same as File->Print...  
Similarly it would be nice if the Copy/Cut/Paste options applied to the report layout areas too.

But is it clear how to do context switching within the File or Edit menus?
