Target version:	1.8.0	Spent time:	0.00 hour
Bugzilla-Id:	4695		
Description			
The morpho metadata display loses color on mac installer version. However, it works on windows and linux installer. The morpho built from svn on mac works too.			

History

#1 - 01/25/2010 02:23 PM - Jing Tao

When morpho make the transformation, it should know the css style file location. It reads from config.xml and we set it value as lib/morpho-config.jar. In mac izpack configuration file, we exclude the jar from the lib directory. So morpho didn't display correctly. After including the jar, the installer version works.
