Description

Create an XML string based on the Manifest and Entries of a KARFile.

See the example karxml file at the bottom of
https://kepler-project.org/developers/teams/framework/kepler-archive-kar/kar-saving-process

History

#1 - 01/27/2010 08:42 PM - Aaron Aaron

Shell code has been created in the core module: org.kepler.kar.karxml.KarXmlGenerator

#2 - 02/08/2010 05:57 PM - Aaron Aaron

I created one junit test that reads in a test kar file (that I put in the same directory as the Junit test, I guess that's an OK spot for it) and it compares it to an expected output xml file to see if the generated xml matches.

So this bug is done but we still need to use it to create the xml file that gets uploaded to metacat, suppose I'll open a new bug for that.
