

Kepler - Bug #4709

error updating ptolemy/src

01/28/2010 05:49 PM - Oliver Soong

Status:	Resolved	Start date:	01/28/2010

Description			
Mark was trying the latest Kepler and ran into a problem with the build system. I believe he did a full checkout of the trunk (or maybe just modules). ant change-to -Dsuite=wrp found all the modules it needed. ant update failed at the ptolemy module, because ptolemy/src doesn't exist in the stub. It might be nice to check whether the ptolemy folder is degenerate when updating.

I have fixed this so that if ptolemy/src is not present due to a problem with checkout, "ant update" will attempt to download it again.
