

EML - Bug #471

eml spec overview document

04/15/2002 10:41 PM - Matt Jones

Status:	Resolved	Start date:	04/15/2002
Priority:	Immediate	Due date:	
Assignee:	Chris Jones	% Done:	0%

Target version:	EML2.0.0rc3	Spent time:	0.00 hour
Bugzilla-Id:	471		
Description			
<p>Need an overview document that gives the background and rationale for eml. This would likely have both normative and non-normative sections. Would include an overview of the structure of EML and the rationale for that structure, and its intended use. Describes packaging and triples in detail. Probably would have a normative appendix that defines the semantics of every field, which could be auto-generated from the XSD source documentation.</p> <p>Chris -- you started an outline for this. Can you recreate it here or in a document in CVS?</p> <p>We should have this for the 2.0.0 release but will not likely have it for the beta7 release.</p>			

History

#1 - 05/01/2002 05:56 PM - Matt Jones

At SEV meeting decided that Chris and David would be responsible for this document for the beta9 release.

#2 - 05/10/2002 11:02 AM - Matt Jones

Adding Chad to the list of contributors to this document.

#3 - 06/13/2002 06:54 PM - Matt Jones

A prototype has been developed, but need to refine this as the spcification document for the release. Changing milestone.

#4 - 09/15/2002 12:34 PM - Matt Jones

Much progress made, but revisions still required for EML 2.0.0. Changing milestone.

#5 - 09/16/2002 12:15 AM - Chris Jones

Moving the spec document milestone to the 2.0.0 release. There are a number of structural changes that need to be made to this document, as well as content changes.

1) Chapter's 1 and 3 have too much overlap, and so need to be reconciled.

2) The entire document needs to be formatted with section and sub-section numbering for easier referencing

3) Example graphics are needed to get the concepts across

#6 - 09/16/2002 07:46 AM - James Brunt

I've got David scheduled to work on this and I would like to work on it as well - perhaps we could chat and divy up the pieces - James

#7 - 10/07/2002 02:07 PM - Matt Jones

Completed the spec. Its GREEAAAAT! :-)) Any further issues with the spec should be brought up in their own bug specifically describing the issue that needs to be resolved. RESOLVED FIXED.

Original Bugzilla ID was 471
