Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	4714		
Description			
Adding documentation to an actor (through [actor context menu]->Documentation->Customize) does not increment the LSID.			

History

I don't know how to fix this since KeplerDocumentationAttribute is in the ptolomy module.

#2 - 02/03/2010 04:12 PM - Aaron Aaron

Well the solution I came up with is not ideal, but it works. The KeplerDocumentationAttribute now generates one generic (i.e. it doesn't actually do anything) change request when it is created. Also, the KeplerDocApplicationSpecializer generates a generic change request whenever the documentation is saved. So the LSID revision is rolled properly on the workflow. Closing this bug.
