<b>Bugzilla-Id:</b>	4723		
<b>Description</b>			
There is a directory 'workflows' in the kepler installation directory where you can save kars and have them automatically show up in the library. This should be moved to ~/KeplerData/workflows. I think it should probably also be renamed, but I'm not sure what to rename it to.			

### History

#### #1 - 02/02/2010 02:49 PM - Aaron Aaron

Should this also apply to the module kar directories?

e.g.

<keplerRoot>/provenance/kar

moves to

~/KeplerData/modules/provenance/kar

#### #2 - 02/03/2010 11:41 AM - Chad Berkley

If it's meant to be changed by the user at runtime, then yes, it should be moved.

#### #3 - 02/10/2010 09:43 AM - Chad Berkley

reassigning to aaron.

#### #4 - 02/10/2010 11:03 AM - Aaron Aaron

Workflows directory has been moved into the persistent KeplerData directory. I will also move the module kar directories there. This will require changes to the build system as well as Kepler. Will close this bug when that is done.

#### #5 - 02/10/2010 02:50 PM - Aaron Aaron

kar files are now placed into the persistent data directory at

~/KeplerData/modules/<modulename>/kar

You will need to clean-cache after updating beyond svn revision 23051

closing this bug
