Description

This bug is very specific to computers with certain limitations on computational resources such as system memory being shared as video memory. At least, the system on which this problem surfaced consistently had such a configuration. Further details of the system specifications follow:

Toshiba laptop with AMD Turion X2 Mobile 1.6 GHz with 894 MB of RAM, ATI Radeon X1200, 128 MB video mem, VISTA O/S

This bug is only filed for documentation purposes currently.

History

#1 - 02/02/2010 02:52 PM - Sandeep Namilikonda

Even if the Main Window of the parser is maximized, the application freezes with the extended window becoming dark and non responsive
