

Metacat - Bug #473

LTER Metacat LDAP Authentican is NOT case sensitive for passwords

04/16/2002 10:51 AM - Owen Eddins

Target version:	Postpone	Spent time:	0.00 hour
Bugzilla-Id:	473		

Description

When I try to log in to LTER's metacat my password takes whether it is whether I use upper or lowercase. My username/password is oeddins/Eddins372

So for example

oeddins/eddins372 will get me authenticated in to knb.lternet.edu:8088 metacat

but not in to NCEAS's metacat. I have to type in

oeddins/Eddins372

History

#1 - 04/25/2002 08:25 AM - Jing Tao

I think the problem is because LTER didn't install the new version of Metacat1.1. If Metacat1.1 didn't work either, I think there are some configure problem in LTER Ldap server.
