

Semtools - Bug #4778

Ontology Browser - include more metadata about selected class

02/08/2010 04:40 PM - ben leinfelder

Description

Descriptions and labels and other documentation (?) that can be pulled form the ontology should be accessible when the class is selected. The current box just shows the full URI of the selected class.

If we go with a hybrid tree/table component, some of this metadata can be in the other column[s] of that hybrid.

History

#1 - 02/09/2010 01:27 PM - ben leinfelder

now showing two columns:

-class name

-ontology name (not the URI)

when you select a class, the description shows in the lower text area. we could add a third column, but long descriptions would be hard to read, perhaps.
