Target version:	wrp-modules-2.0.0	Spent time:	0.00 hour
Bugzilla-Id:	4793		
Description If you disable provenance and then click on a row in the WRM you get an error: org.kepler.provenance.QueryException: Queryable for this recording type is not implemented. at org.kepler.provenance.Recording.getQueryable(Recording.java:385) at org.kepler.reporting.rio.util.ProvenanceUtil.getQueryable(ProvenanceUtil.java:53) at org.kepler.reporting.gui.ReportDesignerPanel.lookupReportLayout(ReportDesignerPanel.java:2620) at org.kepler.reporting.gui.ReportDesignerPanel.handleStateChange(ReportDesignerPanel.java:2578) at org.kepler.gui.state.StateChangeMonitor.notifyStateChange(StateChangeMonitor.java:169) at org.kepler.workflowrunmanager.gui.WorkflowRunManagerPanel\$1.valueChanged(WorkflowRunManagerPanel.java:956)

You also can't delete rows when provenance is off, because getDefaultProvenanceRecorder will return a Recording in this case, and I need an SQLRecordingV8. I added a FIXME at the ClassCastException. As a stopgap I was going to disable the delete menu item when provenance is disabled, but this turns out to not even fully solve the issue - a user can immediately disable prov, and then try to delete a row, and WRM hasn't yet gotten it's hands on an SQLRecordingV8.
