Category:	workflow run manager	Estimated time:	0.00 hour
Target version:	wrp-modules-2.0.0	Spent time:	0.00 hour
Bugzilla-Id:	4800		
Description When you export a run, CacheManager's insertObject cannot insert WorkflowRun entries into cache. This is because the call to serializeObjectInFile fails, caused by: Caused by: java.io.NotSerializableException: java.lang.ref.WeakReference at java.io.ObjectOutputStream.writeObject0(ObjectOutputStream.java:1081) at java.io.ObjectOutputStream.writeObject(ObjectOutputStream.java:302)

I believe this is fixed. Aaron, do you consider this fixed with r23291?

#2 - 03/30/2010 07:01 PM - Aaron Aaron

Yes, the solution to use moml as the serialization format to cache instead of a java serialized object seems to be working well.
