Description Changes as decided upon at the Sevilleta EML meeting, April 24-25, 2002: Responsible: Chad 1) Remove role from ResponsibleParty, but keep the simple type for use elsewhere 2) Review and define the values in the role type -- we may have decided to eliminate these enumerated values and just use a free-text element when needed, but I can't tell from my notes.			

History

#1 - 05/06/2002 02:01 PM - Chad Berkley

removed the role element from ResponsibleParty. The simpleType "RoleType" was left for use in other places. I did not change the enumeration because it comes straight from ISO with a couple of additions.
