<b>Bugzilla-Id:</b>	4810		

#### Description

Open the example MOML and save the composite actor as a KAR file. If you extract the MOML from the KAR, you'll see extra properties:

```
<property name="isMultiport" value="true" class="ptolemy.kernel.util.StringAttribute"/>
<property name="isMultiport" class="ptolemy.kernel.util.StringAttribute" value="false">
</property>
```

and

```
&lt;property name="dataType" value="unknown" class="ptolemy.kernel.util.StringAttribute"/&gt;
  &lt;property name="isMultiport" class="ptolemy.kernel.util.StringAttribute" value="false"&gt;
&lt;/property&gt;
```

This causes problems.
