Description

Help!

Will I get a response to this?

As a new user I didn't realize I was trying something novel.

Is there something I can do to recover \.morpho\profiles\Hook_ORNL\incomplete\temporary\1.1 ???

temporary\1.1 only appears in the "open existing" window the first time I try to open it.

I get message.

Warning! WizardPageLibrary - couldn't dynamically generate TextImportAttribute page with identifier: TEXT_IMPORT_ATTRIBUTE_1

Thanks,

Les Hook

Version History

----- ***

Version 1.8.0 is a major update to 1.7 with new features and bugs fixed. The new features are that Morpho supports user saving and opening a unfinished New Data Package/Entity wizard, recovers the crashed New Data Package/Entity wizard, imports the external EML file to Morpho, and exports EML document to Biological Data Profile format file.
