

## Metacat - Bug #4835

### ESA review comments don't appear to users when viewing their documents

#### Description

After the moderator enters review comments and sends a document back for revision, those comments are visible to the moderator in the left panel when viewing the document. However, when the original document submitter logs in and views that same document, the panel on the left reports "No reviews found".

I would imagine the submitter **should** be able to see the reviews, but in any case it certainly shouldn't say "No reviews found".

#### History

##### #1 - 02/26/2010 02:48 PM - Michael Daigle

Fix in 1.9.2

##### #2 - 03/01/2010 04:14 PM - Michael Daigle

The setaccess api in metacat was not correctly parsing the access rules, so permissions for the revision document were not getting added.
