Category:	general	Estimated time:	0.00 hour
Target version:	2.0.0	Spent time:	0.00 hour
Bugzilla-Id:	4847		

Description

Steps:

- On 2.0 branch, drag out e.g. an ImageJ actor, and e.g. change its name and customize its documentation
- right-click on the actor and Save Archive (KAR)
- new actor can be found in library, and dragged out
- restart Kepler
- try to drag the new actor out to canvas, get an error:

```
☐☐ Error inside GetMomlFromLSID.getMoml(): Exception occurred while deserializing object
Error creating alternateGetMoml!
```
