

Metacat - Bug #4850

Get the new TPC scheduler working with the new changes in Kepler from the KarXmlGenerator

02/26/2010 10:36 AM - Jing Tao

| Target version: | 1.9.2 | Spent time: | 0.00 hour |
| Bugzilla-Id: | 4850 | | |
| Description | | | |
| On kepler side, the metadata format to describe the workflow kar file and workflow run files was changed. So TPC scheduler should be changed accordingly. | | | |

I'm in the process of adding tpcStatus in the KarEntryAttributes such that it should look like this:

```
<karEntryAttributes>
<Name>
RIO.1.xml
</Name>
<dependsOn>
urn:lsid:gamma.msi.ucsb.edu/OpenAuth/:8016:19:1
</dependsOn>
<handler>
org.kepler.kar.handlers.ReportInstanceKAREntryHandler
</handler>
<dependsOnModule>

&lt;/dependsOnModule&gt;
    &lt;lsid&gt;
        urn:lsid:gamma.msi.ucsb.edu/OpenAuth/:8061:9:1
    &lt;/lsid&gt;
    &lt;type&gt;
        org.kepler.reporting.rio.ReportInstance
    &lt;/type&gt;
&lt;tpcStatus&gt;SUCESS!!!&lt;/tpcStatus&gt;
&lt;/karEntryAttributes&gt;
```

adding kepler bug dependency

#3 - 03/02/2010 12:20 PM - Jing Tao

After changing the query format and result set style sheet, the tpc workflow and workflowRun search works. The every link of the search results works too.

Now I am working on testing to schedule a workflow run.

#4 - 03/03/2010 05:44 PM - Jing Tao

I just scheduled a tpc-09 workflow. It works. So the bug can be closed.
