Semtools - Bug #4855

Reorder the Full Annotation rows to match madlib order

03/01/2010 09:39 AM - ben leinfelder

Target version:	morpho-plugin-0.9.0		**Spent time:**	0.00 hour
Bugzilla-Id:	4855			

Description

From Shawn:
---
2. The full annotation should be more closely aligned to the terms
used in the madlib. So, e.g., It should go in this order:

```
Characteristic
  Entity
  Standard
  Protocol
  Context
```

3. This would mean we use a different identifier than ox -- maybe just
a number (and drop the o part, or Entity1, Entity2, etc.)

History

I think this makes the table even more confusing than it already is.

The current order matches the examples laid out during SEEK development.

Maybe Context should not even appear here. Or maybe I need to start implementing that connected-line-style mockup we came up with.

Are people even using the table to directly edit the annotations?

> Are people even using the table to directly edit the annotations?

I frequently use the table -- it is especially useful when I want to see how I annotated the columns nearby
