Description

I'm trying to get the command-line execution working where I run a KAR and it produces a run KAR with the workflow/layout/report in it. The current approach is using an outdated class to build the KAR of the runs (org.kepler.provenance.kar.ExportRunsToKAR) and the only other thing I can see is a gui-centric action class (org.kepler.workflowrunmanager.gui.kar.ExportRunsArchiveAction).
