History

#1 - 03/08/2010 03:19 PM - jianwu jianwu

I updated $Kepler\outreach-2.0\resources\demos\getting-started\03-ImageDisplay.xml to fit the new directory name for version 2.0: outreach-2.0.

#2 - 03/11/2010 03:14 PM - Chad Berkley

The installer now places the demos in ~/KeplerData/Kepler-2.0.0/demos. Paths should be updated to reflect that location.

#3 - 03/16/2010 12:52 PM - Chad Berkley

All demo workflows have been updated. There is now a system property DEMODIR that can be used in workflows to get the directory of the demos. This is set in the common/resources/configurations/configuration.xml file. KEPELRDATA is also now a system property and can be accessed through the workflows.
