Description			
The demos path to the R demos should point to the R demos directory, not the outreach demos directory. Make sure this is updated in chapter 8 of the UM and in the demos themselves.

Just noticed that the GSG also uses workflows with RExpression actors (00-StatisticalSummary and 05-LinearRegression). Should these be moved to the R module even though they are deeply ingrained in the current GSG document? (I'm thinking not).

nope, I don't think they should be moved at this point. Lets just leave it.
