

## Kepler - Bug #4879

### RExpression replaces ) in string vectors with } when outputting to a port

#### Description

In an RExpression, create the output port "out" and in the R script, use:

```
out <- c(" ", " ")
```

Hooking this to a Display actor, I get {" ", " "}. This is because RExpression.java line 1139 (I think) has:

```
temp = temp.replace(' ', '}');
```

which replaces all occurrences of ), even within the string.
