

Kepler - Bug #4880

RExpression cannot output matrix of strings

03/12/2010 10:45 AM - Oliver Soong

Description

Create an RExpression with the output port "out" and for the script, use:

```
out <- matrix(letters, 2)
```

Looking at the code, it seems as if a matrix of strings was never really considered. Commas in the strings would likely cause problems, and I don't actually know if there's a StringMatrixToken.
