Kepler - Bug #4888

Runs with 1 error don't highlight red in WRM

03/17/2010 04:00 PM - Derik Barseghian

Description

Looks like the code for dealing with errors is a little broken after the recent refactor of WorkflowRun: Runs with 1 error don't highlight red in the WRM because getErrorMessages always returns 0.

History

#1 - 03/18/2010 12:46 PM - Aaron Aaron

Can you describe how to reproduce the bug.

#2 - 03/18/2010 12:51 PM - Derik Barseghian

Sure. Open a blank worflow and hit run. This will cause one error, yet the run row won't be highlighted red.

#3 - 03/18/2010 01:13 PM - Aaron Aaron

When is setErrorMessages() called after a run? Looks like the WRM is refreshed with WorkflowRun objects constructed using provenance data?

#4 - 03/18/2010 03:47 PM - Aaron Aaron

I think it's better now after revision 23398 in trunk, let me know if that works and I'll check it into the branch as well.

#5 - 03/18/2010 04:21 PM - Derik Barseghian

Did a couple quick tests and it works here, thanks. Nothing to check into the branch since r23398 is just changes to wrp, provenance and wrm.
