Description

As submitter of an ESA document, I was able to modify the doc **after** it was accepted by the moderator, which I believe shouldn't happen. There is no GUI element to do it, so it's not as though this is likely to happen, but as either the submitter or the moderator, I can edit an accepted doc by entering a URL like the following:

<http://data.esa.org/esa/cgi-bin/register-dataset.cgi?stage=modify&cfg=esa&docid=esa.70>

To reiterate, this doc (esa.70) was already accepted when I did this, but I was nevertheless able to edit it and submit a modification. This triggered a 'doc has been revised' email to the ESA moderator list, and threw the doc back into the moderation queue.
