

Semtools - Bug #4902

Annotations duplicated during editing

03/24/2010 11:19 AM - ben leinfelder

Status:	Resolved	Start date:	03/24/2010
Priority:	Normal	Due date:	
Assignee:	ben leinfelder	% Done:	0%
Category:	Morpho Plugin	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	4902		
Description			
Still trying to track down the scenario in which this occurs. I believe it might have something to do with re-reading the annotation from disk after a datapackage is closed (the intent being to revert back to the last saved version instead of the current version in memory).			

History

#1 - 03/24/2010 02:33 PM - ben leinfelder

Stale listeners were hanging around and responding to events that they should not have responded to - hence duplicating the same actions when windows were closed then reopened.

Now when the window closes, we remove the listeners (and hope they are GCed)
