

FIRST - Bug #4918

New feature request (inter-related multi-part questions)

03/30/2010 08:12 PM - Sandeep Namilikonda

Status:	New	Start date:	03/30/2010
Priority:	Normal	Due date:

Target version:	post-clientprototype	Spent time:	0.00 hour
Bugzilla-Id:	4918		
Description A multi-part question can sometimes be framed in such a way that the answer to an earlier part could serve as the basis for the subsequent parts (questions). Two issues can be thought off. a) Does each part need to have the text corresponding to all the preceding parts in order to put the question in context? b) When a user's search on the FIRST web interface returns specific assessment items (unlike the whole assessments being returned currently) and one of those items happens to be a part of a multi-part question, would it be possible for the user to be able to retrieve the related parts (and all the possible responses for inter-dependent parts, if need be) just by a click of a button? Please list any potential solutions/suggestions as comments in reply to this report.
