

## Kepler - Bug #4925

### Components search occasionally shows different results

04/02/2010 12:49 PM - Derik Barseghian

#### Description

I've been deleting KeplerData, doing a clean-cache, restarting Kepler, and then searching for 'sdf' a lot lately. Every so often the first search yields:

- Wmsd Actor
- SDF Director

However the majority of time, and on a subsequent search, I just get the SDF Director, as expected. This is really trivial and isn't causing me any problems.

#### History

##### #1 - 04/12/2010 01:16 PM - Aaron Aaron

I was unable to reproduce this bug. If you only search for "sd" then you get both the SDF Director and the Wmsd Actor in the search results. But a search for "sdf" only returns the SDF Director.
