

Kepler - Bug #4930

Failing to download a dependent module still indicates success

04/05/2010 05:10 PM - Sean Riddle

Status:	New	Start date:	04/05/2010
Priority:	Normal	Due date:	
Assignee:	David Welker	% Done:	0%
Category:	build system	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	4930		

Description

If one attempts to download module dependencies of a broken KAR by right-clicking and selecting "Import Dependent Modules," and the module is not found, a message ("Error downloading module: xxxxxx") is produced. Following this, the message "Module Download Complete. You may need to restart Kepler for full functionality" is produced. A different message, reflecting this failure, should probably be produced instead.
