

EML - Bug #497

use full names for elements and attributes

05/01/2002 06:08 PM - Matt Jones

Status:	Resolved	Start date:	05/01/2002
Priority:	Immediate	Due date:

Category:	eml - general bugs	Estimated time:	0.00 hour
Target version:	Beta9	Spent time:	0.00 hour
Bugzilla-Id:	497		

Description

Changes as decided upon at the Sevilleta EML meeting, April 24-25, 2002:

1) Systematically check that all modules use a full word for element and attribute names. Concatenated words should use camel capitalization (e.g., myGoodElement).

History

#1 - 06/13/2002 06:56 PM - Matt Jones

Contributors said they checked all modules. This should be completed now and in CVS.

#2 - 03/27/2013 02:14 PM - Redmine Admin

Original Bugzilla ID was 497
