#### Description

When running the WRP suite, if you create a workflow and a report design(roml), File => Save Archive should save the workflow and the roml, whether or not you've run the workflow.

However sometimes only the workflow is saved. Other times the workflow, the roml, the rios, and the workflowRun are saved. I'll try to post replication procedures if I can figure them out. This is in trunk wrp at r24154.

#### History

##### #1 - 05/06/2010 02:03 PM - Derik Barseghian

The issues wrt entire additional sets of run and reporting artifacts should be fixed now.  
The issue of Save Archive sometimes giving a run and rios should be fixed now.

Leaving open for further testing...

##### #2 - 05/07/2010 06:09 PM - Derik Barseghian

Can't get this to happen anymore, closing.

##### #3 - 05/17/2010 12:22 PM - Derik Barseghian

This is happening again. To replicate: create a simple workflow and report, run it, export the run to a kar. Then File => Save Archive. This second kar should only contain the wf and roml, but it contains the additional items associated with the execution.

##### #4 - 05/17/2010 01:56 PM - Derik Barseghian

fixed in r24456 and r24457
